

### Club members

It has come to our attention that not all of the members are aware of how your club dues are utilized. Below is a list of the general year to year expenses for the club and where it lists as “Members perform” the club provides the funding for materials and the Members provide the Labor. This is often a small dedicated group of core members providing this service. I am sure they would welcome some new participants.

Remember this is your club and your field and it takes effort to keep it in the shape that it is. Please come out and support or volunteer for the maintenance efforts, our fun fly’s and events that promote the club locally. Doing that will help keep our club dues low.

Thank you:  
The executive 2013/2014
